DETAILED ACTION

1. The information disclosure statement filed 3/7/02 has been considered to the extent that is possible from the content of the application for those documents not in the English language.

Specification

2. The title of the invention is not descriptive. A new title is required that is clearly indicative of the invention to which the claims are directed.

Claim Rejections - 35 USC § 112

3. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

4. Claim 2 is rejected under 35 U.S.C. 112, second paragraph, as being incomplete for omitting essential subject matter in steps, such omission amounting to a gap between the steps. See MPEP § 2172.01. The omitted essential subject matter has to do with the limitation "adding at least one vinyl monomer continuously or intermittently to the aqueous solution of the neutralized macromonomer". While the claim recites "wherein the emulsion polymerizing includes", the actual initiation of polymerization is not recited or indicated as a step in this claim. As such, it is unclear what limitation applicant means to encompass by "continuously or intermittently": Does this step relate to the initiated propagation step(s) or the pre-emulsion?

Claim Rejections - 35 USC § 102

5. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

6. Claims 1-11 are rejected under 35 U.S.C. 102(b) as being anticipated by Huybrechts et al. (CA 2,149,399)

In page 5, lines 5-36 and col. 12, lines 11-34 and the Examples, Huybrechts et al teach an aqueous resin dispersion prepared by free radical polymerization of vinyl monomers in the presence of a neutralized (see col. 19, lines 18-24) terminally unsaturated ionic acrylic macromonomer (emulsion stabilizer) having an average molecular weight of between 500 and 30,000, prepared from, for example methyl methacrylate and 40% methacrylic acid. In page 17, line 1, the terminally unsaturated macromonomer is taught to be prepared at temperatures up to 200 °C.

Thus, the requirements for rejection under 35 U.S.C. 102(b) are met.

Claim Rejections - 35 USC § 103

7. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

8. Claims 1-11 are rejected under 35 U.S.C. 102(b) as anticipated by or, in the alternative, 35 U.S.C. 103(a) as being unpatentable over Yamamoto et al. (JP 06172466)

Yamamoto et al. teach an aqueous resin dispersion prepared by free radical polymerization of vinyl monomers in the presence of a neutralized (see col. 19, lines 18-24) terminally unsaturated ionic macromonomer (emulsion stabilizer) with a methacryloyl group at the terminals. (See abstract).

Even if assuming that the prior art reference does not meet the requirements of 35 U.S.C. 102, it would still have been obvious to one of ordinary skill in the art, at the time the invention was made, to arrive at the same inventive composition because the disclosure of the inventive subject matter appears within the generic disclosure of the prior art. See MPEP § 2111 - § 2117.
